Authorized as second class mail, Post Office Department, Ottawa.

Income Tax and The Farmer

On March 28th, 1946, a delegation of 14 representatives headed by H. H. Hannan, met with the prime minister and members of his cabinet and presented a brief on behalf of Canadian agriculture.

This presentation included a number of recommendations regarding income taxation and its effect on farm business. It is most encouraging to note the cabinet saw fit to recognize the logic and fairness of the Canadian Federation's claims and included a number in the budget proposals announced in the House of Commons June 27th.

One of the most important is the provision that allows farmers and fishermen to average their income tax over a period of three years. This will be a "moving" average, that is, the three year period will be moved along with each succeeding year. The benefit of this provision will be removed until after the farmers will make their first three year average calculation. It means a farmer should make out his income tax returns regardless of his net profit or loss. Crop failure may mean no profit in two of the three years. The returns of the third year which may be a bumper, can be average with the two preceding years before the income is taxable.

The second provision of importance is that in which a working wife is allowed an exemption of \$250 on income earned by herself in addition to the married exemption of \$1500 on the husband's income.

Another provision is that when there has been a delay of several years in checking and completing income tax returns, interest on amounts found due and payable after checking will not be collected for a longer period than 20 months. This is even better than the Federation request for a two year limit.

A fourth provision provides for the establishment of a board of appeal where claims against assessment of income tax in the year of 1946 and in subsequent years may be heard.

The removal of excess profits tax from a farmer who is sole proprietor of his farm and the increase of exemptions of 1200 to \$1500 for married couples and \$660 to \$750 for single persons will be of benefit.

There is no doubt that the Canadian Federation of Agriculture was instrumental in gaining these concessions. In regard to the three year moving average it is now up to the in-

THE HABIT STICKS

Farmers of Canada were among the shrewdest buyers of Victory Bonds during the war, records show. Once they had cleared off pre-war indebtedness and had begun to benefit by the increased wartime demand for agricultural products they became steady purchasers throughout the successive Victory Loan campaigns.

So it is not surprising that the sale of Canada Savings Bonds during the first week revealed that the man on the farm, and his wife, have not forsaken a habit which they have found to be good for themselves. From rural districts of each province, comes the same story, the sale of Canada Savings Bonds is "steady."

It has often been stated that the farmer proves a tough customer for the salesman, that he is hard to sell on the first approach, but that once sold, he stays sold. Whether or not such an assessment is a fair one in its entirety, might be argued. But at any rate, so far as bonds are concerned, the latter part of the statement appears to be correct.

Junior Aid Meet

The Junior Ladies' Aid held their monthly meeting at the home of Mrs. B. Fox on Monday evening. Fancy work was turned in and a waffle, coffee and pie sale decided on for Saturday, Nov. 2, in the Scout Hall. The next meeting will be held at the home of Mrs. H. Greenlee the third Monday in November.

OFF THE RECORD

Reports indicate that there are Canadians who are still refusing to drink milk due to the rise in prices which reveals that these Canadians apparently favor increases for the doctors rather than for the farmers of this country!

The stingiest man we ever heard of bought his bride a nickel's worth of peppermint lozenges and took her on a trolley-ride honeymoon.

When they got off the car he said, Honey, suppose we save the rest of this candy for the children.

Individual to make his returns regularly so that full information is available for averaging his income.

Three More Mines Join U.M.W.A.

Every pit, large and small, in the Drumheller Valley domestic coal fields is now organized under the United Mine Workers of America, District 18.

Five unattached small operators signed contracts with U. M. W. A. Friday following negotiations by district officer E. D. Boyd of Calgary.

Three small mines at Wayne one in Cambria and another in North Drumheller, signed the contracts. Twenty three mines are now under charter in the valley.

First Three "Sub" From Nova Scotia

As we explained in these columns two weeks ago we are offering a three year subscription to the Chronicle for \$5.00 due to the fact that we must vacate our present living quarters and as no house is available in Carbon we must build. The first five dollar subscription was received this week from J. B. Hart at Elmdale, N.S. Here is his letter.

Dear Sir:

Enclosed please find \$5.00 for three years subscription for J. B. Hart.

We've had a beautiful summer and fall, almost as nice as Alberta can give us. We were delighted to see Fred and Len Poxon this summer. We also had a visit from Rev. and Mrs. D. E. Hattie who lived in Carbon 20 years ago. They are now in Connecticut, U.S.A.

We wish to be remembered to our many friends in and around Carbon.

Estate of Robert Edward Levins deceased

Notice to Creditors

Notice is hereby given that all creditors and other persons having any claims or demands against the Estate of Robert Edward Levins, deceased, who died on or about the 29th day of June, 1945, at the City of Victoria, in the Province of British Columbia, are required to send to the undersigned on or before the 15th day of November, A.D. 1946, their names, addresses and descriptions, and full particulars in writing of their claims, verified by Statutory Declaration.

And take further notice that after the 15th day of November, A.D. 1946, the Executor of the said Estate will proceed to distribute the assets thereof among the persons entitled thereto, having regard only to the claims and demands of which it shall then have had notice.

Dated at Victoria, British Columbia, this 15th day of October, A.D. 1946.

R. S. Stuart Yates,
for Messrs. Yates & Burns.
Solicitors for The Royal Trust Company, Executor of the Estate of Robert Edward Levins, deceased, 620 View Street, Victoria, B.C.

CARBON AND DISTRICT NEWS NOTES

★ The I.O.D.E. will sponsor a dance in the Scout hall on November 11. Trochu orchestra For Sale—Weaner pigs. Apply to W. A. Freeman, Ardenode. 33tp.

★ Born—to Mr. and Mrs. H. Bramley, a son, October 20.

★ The Junior Ladies' Aid will sell waffles, pie and coffee at the Scout Hall on Saturday, Nov. 2 commencing at 3 p.m. Everybody welcome. Come and enjoy waffles for a change.

★ Notice Alf Fox sporting a black eye. He claims he got hit with a wedge but some people seem to differ with the story.

★ Mr. and Mrs. J. Adams were week-end visitors to Olds.

★ Gordon Murray attended a Massey Harris tractor demonstration in Calgary this week.

★ Mrs. C. Friesen of Stettler was a recent visitor at the home of Mr. and Mrs. C. H. Nash.

★ Harold Anderson's orchestra will play for a dance in the Scout hall Tuesday, Oct. 29 and not Wednesday as stated last week.

★ With the fair weather of the past week harvest operations in this district are beginning to come to an end.

★ Help the printer build his house. Renew that subscription today. \$2 per year, \$5 for three years.

Rockyford Girl Wins Wheat Trophy

Rockyford Junior Wheat Club, in a dazzling display, made a clean sweep at the 12th annual junior grain club exhibition sponsored by the Drumheller and district Board of Trade and the Alberta department of agriculture Saturday.

Marjorie Roppel, 17-year-old grade XII student of Rockyford won the Toshach trophy, emblematic of the grand championship of the show. The Rockyford club won the Board of Trade prize for the best display. Judges E. Patching, Edmonton, and A. D. McFadden termed the fair "far the best" held in the province.

Mr. Bell and field supervisor John Umbrite were highly lauded by the speakers for the interest displayed in the junior

THE WORLD OF WHEAT

Our Farmers Losing 63c A Bushel

A farmer friend wants me to state in this column whether Britain is re-selling Canadian wheat to other countries, which Britain purchases from Canada at \$1.55 basis 1 Northern Fort William, and who receives the profits on such re-sales.

The British Government does not divulge this information. Britain has the right under the Wheat Agreement to re-sell Canadian wheat that she buys at \$1.55 at any price she can secure, and anywhere she pleases. When she re-sells Britain keeps the profit. It would seem incredible that countries like South Africa, New Zealand, Newfoundland, Denmark, Holland and others who want Canadian wheat should pay Canada \$2.18, the official Board price, when Britain will have a surplus of Canadian wheat and can sell it at a cheaper price than 2.18 and make a profit for herself. The British government announce in August that it intended to re-sell some of this wheat to Germany. It also seems amazing to think that Germany, our late enemy, can have wheat supplied to her at \$1.55, and that countries which were our Allies in the war, and as close as Newfoundland, would be expected to pay \$2.18.

In any way we look at it our prairie farmers are losing 63 cents a bushel on all the wheat we sell to Britain, and on all that Britain re-sells to Germany and others.

For Sale—Four room house. Apply K. Schuler, Carbon.

So good were the exhibits the samples of Marjorie and Audrey Roppel were entered in the Toronto Royal Show. There is still a possibility of this district yielding the Canadian champion.

Rockyford winners were: 1. Marjorie Roppel; 2. Audrey Roppel; 3. H. Heinslemir; 4. Howard Roppel.

The Rockyford club adopted a simple but attractive display. Their section was marked off with a hand-carved name plate on a four foot board. Their wheat was exhibited in five pound glass coffee jars, each labelled with a letter R sketched in ink. Each letter was uniform in size.

Immigration Policy

THE SUBJECT OF IMMIGRATION is receiving a great deal of attention in Canada today. It came up frequently in debates during the last session of Parliament, and at that time it was announced that an inter-departmental committee was preparing a post-war immigration policy. The matter was also brought up in the Upper Chamber, when the Senate Immigration Committee brought in a report in which it was urged that a vigorous policy of selective immigration be commenced as soon as shipping space becomes available. It also stated that the subject of immigration is of the greatest importance to the people of this country "if we are to hold our place abroad and improve and maintain our standard of living at home."

Little Hope For Future

Canada has some 3,500,000 square miles of territory including large areas where there are valuable resources and rich land waiting to be developed. In view of these facts, the question has frequently been raised as to whether the present population of 12,000,000 people can expect to remain in exclusive ownership of so much land, when in other parts of the world overcrowding and many industrious, deserving persons, look to the future with little hope if they must remain in their present surroundings. Those who favor an extensive immigration program, stress that it must be on a highly selective basis and that all those admitted must be the type of people who would be an asset to the Dominion.

Changes Made In Regulations

In 1931, when there was widespread unemployment in Canada, the immigration laws were amended, and unrestricted immigration was limited mainly to British subjects, citizens of the United States, and a few others in special categories. These regulations are still in effect, although recently arrangements were made to admit relatives of Canadians from foreign countries, if the Canadian relatives can guarantee to provide for them and arrange for their accommodation. It was also decided to admit some 4,000 unmarried Polish veterans who had fought in company with the Canadian Army in Italy. These men were brought into Canada on the understanding that they would work on farms for at least two years after their arrival. There is a strong opinion among many individuals and organizations throughout the Dominion in favor of a selective policy of immigration which would build up the population, settling our unoccupied land and providing wider domestic markets for the products of our farms and factories. There will be great interest shown in whatever action is taken in regard to this matter during the coming months.

JAM BRINGS HIGH BID

KANSAS CITY.—A jar of regular damson plum preserves with a special label brought a high bid of \$2 at the Woman's City Club annual harvest festival here. The preserves were contributed by Mrs. Harry S. Truman, and bore a White House label.

Using New Material

Colored Plastic Replacing Wood
Planking As Decks For Ships

The wooden planks of the Mauretania's decks are to be replaced by colored plastic. This new decking, which is just as strong as wood planking, has a number of advantages over the old type; it is easily washable, does not need holystoning, and will not absorb oil or grease. This plastic decking is a Clydeside development. Green plastic has been tried successfully in the Blackburn, a vessel in naval service. It is claimed to be springy underfoot, proof against tropical heat or Arctic cold, and will not catch fire. It is restful to the eyes against sea glare.

Another use of plastics in British shipyards is on the Queen Elizabeth, whose hull is being treated below the waterline with a plastic composition.

Henri Becquerel discovered radioactivity in 1896.

A Hapless Male

Was Routed Out From A Butcher's Counter By A Woman Customer

PHILADELPHIA.—An unidentified man seeking to buy meat was routed empty-handed by a housewife who struck him over the head with a leg of lamb.

The leg of lamb, placed on the counter by a butcher, was the only meat in sight of about 100 customers jammed into a narrow aisle. Both the man and woman snatched for the leg.

The woman got the firm grip and after a short struggle had exclusive possession and brought the cut down over the man's head. Other women jeered him. The hapless male gave up and walked out.

To Feel Right — Eat Right!

NEW Faster Acting ROYAL Ends Overnight Bother—Risk!

NEW Fast Rising Royal is here! The modern baking discovery that lets you do all your baking in a few hours . . . by daylight! No "setting bread" the night before—no baking disappointments because dough spoiled during the night when the kitchen temperature changed. New Fast Rising Royal is ready for action 10 minutes after it's dissolved in water!

And the rich, home-baked flavor of bread baked with New Fast Rising Royal will make your family brag about your baking more than ever. You get 4 packets in each carton of New Fast Rising Royal—4 large loaves per packet. Stays full-strength, for weeks on end. At your grocer's—now!

SMILE AWHILE

Don't worry if your job is small, and your rewards are few; Remember that the mighty oak Was once a nut like you.

"What makes you look so dirty?" asked the neighbor.

"Well," replied the little lady of five, "you gave my brother a dime yesterday to wash his face."

Youthful Father: "Our baby is beginning to recite 'Baa, baa black sheep, have you any wool?'" Neighbor: "And he's only eight months old?"

Father: "Well, he doesn't say all of it yet, but he's got as far as the 'Baa, baa.'"

The teacher had recited "The Landing of the Pilgrims." Then she requested each pupil to draw from his or her imagination a picture of Plymouth Rock.

Most of them went to work at once, but one little fellow hesitated and at length raised his hand.

"Well, Willie, what is it?" asked the teacher.

"Please, ma'am, do you want us to draw a hen or a rooster?"

Binks: "I'm the happiest man in the world. I have the best wife in the country."

Banks: "Well, who wouldn't be happy with his wife in the country?"

Mr. Smith: "Your wife used to be nervous now she doesn't seem to show a sign of it. What did you do for her?"

Mr. Brown: "That was easy; the doctor simply told her her nervousness was a sign of age."

At a local concert for the troops an amateur soprano "obliged". She sang or, rather, she warbled all over the notes.

At the finish there was a short silence, broken by one or two hand-claps. Then a husky voice came from the back seats:

"Now give us the 'All Clear', missus."

Uniform Trouble

Vancouver New Police Are Forced To Wear Plain Clothes

VANCOUVER.—The clothing shortage is interfering even with the city police department.

Board of Police Commissioners has learned that it takes "three, four or five months" to get new police uniforms.

"We have our new men going around in plain clothes, and we can't use them properly that way," said Police Chief Alex McNeill. 2693

ALWAYS GOOD SPORT

Winston Churchill has always manifested a bland disregard for railway schedules and his habit of catching a train by the skin of his teeth has always been an anxiety to his travelling companions. A friend once chided the statesman for his little weakness. "Winston is such a sportsman," explained Mrs. Churchill; "he always gives the train a chance to get away."

In ancient Rome, mouldy bread was used to hasten the healing of wounds.

Used to Wake Up with a Headache

Now Fresh and Lively
Every Morning

Here is a man who woke up most mornings with a dull headache. What a dismal way to start the day! But Kruschen transformed his life, according to his letter:—

"I used to wake up in the mornings with a dull headache. A year ago, I started taking Kruschen Salts regularly. Today, I wake up fresh and lively and can do my day's work without undue exertion. I find Kruschen Salts a great help, and have not been so healthy for a long time. I can recommend Kruschen for anyone suffering from headaches and constipation. I'll never be without Kruschen as long as I live!—E.P."

Dull headaches such as this man suffered from can often be traced to a disordered stomach and to constipation because of waste material which remains in the system. A small dose of Kruschen taken regularly in the morning promptly helps to remedy this condition. And that is how Kruschen acts to relieve such headaches.

Try Kruschen for relief of morning headaches and sluggish feelings. 25c and 75c at all drug stores.

Housekeeping In The Future Will Be Made Easy By Many New Devices Being Planned

At the moment the vital need is to get sufficient homes of reasonably good standard to ensure that everyone may enjoy privacy and health. But once the back of this task is broken it will be possible to look forward to homes in which a steady stream of new materials and new devices will greatly lighten the task of the housewife and make housekeeping a matter of two or three hours' work a day instead of a drudge from dawn till dusk.

The house of the future will require little or no dusting, and the brush and pan may be relegated to museums.

There will be no dust, because it will be automatically collected before it has time to settle. This will be done by a simple electronic device already in use in some factories for collecting dust produced in manufacturing processes.

The principle is that by which objects bearing opposite electrical charges are attracted to each other. The dust particles are given a positive charge and a small electronic device, using a trifling amount of current and easily concealed in the ceiling, is given a negative charge.

It attracts the dust particles of it, and they are thus collected before they can settle. The housewife's dusting will be limited to emptying the dust container every few days.

The kind of dirt that is brought into the house on shoes or results from accidents or wear will be reduced and much more easily removed by new devices and materials. For instance, on the doorstep there will be a mat, but a new kind which moves rapidly and automatically cleans the shoes.

A person entering the house will simply touch a button for a few seconds and his shoes will have all the dirt removed. It would be simple to arrange so that the mere weight of anyone coming in would automatically set the brushes in movement during the few seconds required for the door to be answered or the key to be found.

Furnishing materials will be water and dirt proof. Cleaning the curtains will be simply a matter of wiping them over with a sponge as they hang. Upholstery will be cleaned in the same easy way. And if your child spills ink or gravy on the best tablecloth it will roll harmlessly to the floor, which, covered in stain-proof carpet, will be quite undamaged.

Even windows may be kept clean automatically, either by the application of a grease-resisting chemical or an electrical device that will repel dust and dirt particles.

Incidentally, windows will probably have a high-frequency device that will "electrocute" all flies and insects as they try to enter.

Cooking will be very much simplified by the use of electronic ovens, already being used for some industrial materials that require "baking". In the electronic oven there are no flames or red-hot wires. The heat is produced internally in the article being cooked by "radio" waves.

The advantages are many. First, there is speed. A joint and two vegetables could be cooked within five minutes of being placed in the oven. Meat will be cooked evenly all through, instead of from the outside towards the inside. There will be no more dishes burned outside and raw in the middle!

This will be particularly valuable in the case of bread. It will be possible to decide the exact depth of cooking desired, and leave the oven to switch off automatically when the right point has been reached.

This method of cooking will result in meat being more tender, and there will be less "drying-up".

The housewife of the future will certainly have a "deep-freezing" section in her larder. In this, meat, vegetables and fruit will keep safely for weeks or months. Peas, strawberries, chickens, or whatever it may be, will simply be placed in the container and taken out six or twelve months later for use as required.

For entertainment in the home the housewife will have a "big screen". Television will also serve her in other ways. For instance, there might be a television screen in the kitchen automatically recording the picture of any one on the front doorstep.

An automatic television camera at the end of the child's cot will enable a mother to sit comfortably in another room "keeping an eye" on the baby—on a portable screen.

Instead of having to get up to turn the radio on to another program she will be able to "dial" from where she is sitting whatever station is required.

Radios may have "selecting" fittings enabling the owner to pick out the programs required at the begin-

ning of the day and to "set" them ready.

The telephone will be immensely improved.

If it is left unattended it will automatically explain to callers that the owner is out and take a message which will be repeated to the owner on his return.

Telephones are already in use which will light a stove ready for the owner. It will be possible for the housewife or business man to call their home from a transmitter weighing only a pound or two while walking in the street or travelling by train.

Items Of Interest

Experts have completed a study of the effects of color on children's work in school, and have come up with the decision that classrooms painted yellow or pale green do most to encourage study.

It is believed the poliomyelitis was first described by a London physician in 1784.

Smallest electric motor in the world, made by Robert Stanley Lewis, retired British engineer, is not much larger than a pinhead.

Key West, Fla., has one street which runs from the Gulf of Mexico to the Atlantic ocean. It is Duval street.

Peter the Great of Russia could not read or write until he had been czar for five years.

The longest elephant tusk of which there is authentic records is 11 feet, five and a half inches long, and 18 inches in circumference.

The cost of food of Columbus' expedition was fixed at six pesetas a month per each man, or about four or five cents daily.

WILL BE RETURNED

Gold stolen by the Nazis in the allied countries during the war will be given back by a tripartite commission formed of representatives of the United States, Britain and France. Russel H. Dorr, American delegate, said the estimated value of the gold stolen by the Nazis exceeded \$700,000,000.

Casein is processed into paper coatings, wall paints, adhesives, buttons and other products.

SEA SHELL QUEEN — Weston Jayne wears a big smile, a little bathing suit and has a firm grip on a sea shell. The latter comes into the picture because Weston has just been named Sea Shell Queen at the St. Petersburg, Fla., beach frolics.

Have A Grievance

Eskimos Claim Visit From White Men Always Brings Common Cold
VANCOUVER.—The Royal Canadian Mounted Police patrol boat, St. Roch, arrived back here recently after an absence of 18 months.

The ship left here in the summer of 1945, under command of Sub-Inspector Larsen, and sailed to Cambridge Bay, far inside the Arctic circle. Here it served as headquarters for the crew as they patrolled the Arctic by dog-sled. Aboard the St. Roch on the return voyage was Constable A. C. Levens, 25, of Alberta, who had not been "outside" since 1942. His patrols ranged 1,000 miles and took up to 40 days at a stretch.

The 10-man crew reported that Eskimos around Cambridge Bay have a grievance against the white men. The common cold was unknown to them before his coming. "They never catch a cold except when an aircraft arrives with the benefits of civilization," said engineer George Peters of Victoria. "We also never had one until we made contact with Operation Muskox, then we all had colds."

Speaking for his crew, Inspector Larsen said: "I guess the Arctic is a place you want to go back to. Every time spring comes I want to be off again." As winner of the Patrons Medal of the Royal Geographical Society for his 1942 cruise through the northwest passage, he should know.

WHOLESALE FORGERY

Secret printing presses in Germany are turning out a flood of bogus travel permits and documents for sale to soldiers seeking illegal leave, to displaced persons wishing to move out of Germany, and to German civilians masquerading as allied nationals, the London News Chronicle reported.

Confucius is believed to have been born in China in 551 B.C. and to have died in 479 B.C.

Division Of Entomology Visits North West Territories To Check On Insect Pests

In the course of a visit of inspection of the North West Territories to check on the prevalence of insects, insect control, and incidentally of vegetable production, crops, markets, and other related agricultural conditions, Alan G. Dustan, Division of Entomology, Science Service, Dominion Department of Agriculture, compiled much valuable information. On the journey north the places visited were Fort Smith, Fort Resolution, Hay River, Yellowknife, Port Radium, Fort Norman, Fort Good Hope, Aklavik, and the Reindeer Settlement on the Mackenzie Delta.

On the return journey up the Mackenzie river, Fort MacPherson, Norman Wells, Fort Simpson, Trout River, Fort Providence and other points were the places inspected. Due to accommodation difficulties some nights were spent in R.C.M.P. barracks, boat houses, laundries, igloos, airport bunkhouses, and other unusual places.

As it happens insects are most numerous in the North West Territories in years of drought. This year, the season has been a comparatively wet one, so Mr. Dustan found that insects in gardens were extremely rare. In fact no insects were found in any garden until Fort Simpson was reached on the return journey when grasshoppers were discovered invading gardens and the red turnip beetle appeared on a variety of plants. The only explanation of the general scarcity of insects, says Mr. Dustan, was that the season was a relatively wet one and most gardeners stated that insects were of importance only during seasons of drought. Traces of insect damage were discovered at Fort Smith where the work of cutworms was evident, and at one or two settlements where injury by the cabbage maggot could be detected.

In discussing insect conditions in the average years with the growers, the story right along the line seemed to vary very little. Grasshoppers in most cases were regarded as insect enemy No. 1, with the red turnip beetle a close second. Then followed cutworms, cabbage maggot, and the imported cabbage worm which caused considerable damage to cruciferous

crops, of which many varieties are grown in the North.

There appeared to be no insects attacking potatoes, and, says Mr. Dustan, it was a strange sight to one from outside to see this crop growing fresh and green without any evidence of insect damage, although no spraying and dusting had been carried out. All the growers have to do is to plant the potatoes in the spring and dig them up in the late summer. Seed potatoes might be grown with success in the Territories.

One of the surprises in the North West Territories is the number and extent of some wonderful gardens, ranging from 10 feet square to 14 acres; also the number of greenhouses was remarkable. Most of the crops were excellent and undoubtedly were given great care by their owners. But there is no need for a planned course of insect control. Owing to the great distances and the naturally high freight charges, insecticides are practically unobtainable locally, and spraying equipment is virtually non-existent. Hence little can be done in the way of insect control when outbreaks occur.

Bobby-Sox Doll

by Alice Brooks

The teen-ager will want to be right in the groove and make this bobby-sox sweater girl to sit right on her bed. The perfect mascot.

Miss Bobby Sox has the wardrobe musts of sweater, skirt, and date dress. Pattern 7116 has transfer, directions for doll and her outfit.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Started The Idea

Canadian Who Developed International Peace Garden: Died In Kingston

Henry Jackson Moore, 67, of Islington, Ont., developer of the International Peace Garden on the Manitoba-North Dakota boundary, died in Kingston, Ont. He was an associate of honor of the Royal Horticultural Society of Great Britain and a graduate of the Royal Botanical Gardens at Kew, London. He came to Canada in 1909.

The National Association of Gardeners adopted Moore's idea of an international peace garden in 1930 and undertook to raise \$5,000,000 for this memorial to a long-peaceful boundary. Mr. Moore, then with the Ontario Department of Agriculture, became secretary of an international committee. North Dakota and Manitoba set aside more than 3,000 acres between Boissevain, Man., and Dunseith, N.D., for the purpose and the peace garden was opened in 1932.

Acron, a Greek physician, is reported to have originated fumigation in 473 B.C., when he halted a plague in Athens by burning aromatics in great fires.

SARNIA DRILLERS HIT GAS POCKET—Drilling for water near Sarnia, Ont., operators were surprised when bit hit a natural gas pocket at 145 feet which blew in this "gusher" with a roar and sent rock, sand and water 200 feet over their rig. The well continued spouting at intervals for hours.

Canada Is Small Exporter of Butter

Every once in a while some citizen takes his pen in hand and writes to the papers, alleging that large quantities of Canadian butter have been shipped overseas. Recently, a correspondent of one paper made the astounding assertion that 1,500,000 pounds of butter had been shipped to Latin and South America and even Alaska.

How far he was wide of the mark is shown by an official statement of the Prices Board that only 100 pounds of butter had been exported to Alaska and that was to meet the needs of a small community which could be conveniently reached only from the Canadian side.

As regards Latin America, exports amounted to 300 pounds and this went to Columbia for the use of a group of Canadian nationals in that country.

The only other places where Canadian butter is exported to is Newfoundland and the British West Indies, which have always drawn a considerable part of their requirements from Canada and the total export in this direction is about one per cent of Canadian production.

No Undue Price Rise Survey Reveals

Retail price surveys conducted recently by the economics branch of the Prices Board have shown that very little rise in prices have occurred in the various items that the board has suspended from price control. The surveys, made to provide some indication as to the results of the board's decontrol measures were conducted in all major Canadian cities from coast to coast.

The results were not surprising however, as articles suspended from price ceiling regulations were in good supply with no price increase likely to follow or had little or no effect on the ordinary household budget.

Goods that were checked covered a wide field of consumer-type articles from cosmetics to hardware, and the only sizeable price increase noticed was that of sterling silverware where prices were increased in line with the domestic price of silver to the world level.

Some of the miscellaneous items suspended which showed no price changes included clean-

ing fluids, furniture polish, hair curlers, safety razors, light bulbs, antiseptics, deodorants, laxatives, fruit salts and cod liver oil.

Other price changes were found in only a very small proportion of the stores checked. Metal polish, out of 120 price checks no increases and one decline; envelopes, 165 price checks, five increases, no declines; hair dressings, 225 price checks, one increase, on decline.

Unimportant grocery items suspended from price control showed diverse price changes. Dried coconut advanced, preserved horseradish declined. Prices of olives, pickles, maraschino type cherries, candied fruits and peels increased. Declines were noted in prices of canned beets and carrots and canned lobster prices increased significantly.

Increases were fairly general in the case of household paper products, absorbent cotton, axes, lawn mowers, nails, wooden clothes pins and men's rubbers, although in most instances the price increases were slight. Al-

uminum double boilers were increased in price in about a third of the cases while the enamel types were generally unchanged.

The Government Liquor Control Act of Alberta APPLICATION FOR BEER LICENSE

Public notice is hereby given that the undersigned intends to apply to The Alberta Liquor Control Board for a License to sell Beer by the glass or open bottle, for consumption on the licensed portion of the premises and also to sell Beer by the unopened bottle for consumption elsewhere than upon the Licensed premises, in conformity with the provisions of The Government Liquor Control Act of Alberta and the Regulations made thereunder, with respect to the following described premises:

Beer salesroom in the South East portion of the ground floor of the Carbon Hotel, situated on Lots 29-30-31, Block 4 Plan 4387P, in the Village of Carbon, Province of Alberta.

Dated at Carbon, Alberta, this 17th day of October, 1946.

FRANK STOCKL, Jr.
Applicant.

Bread Price To Stay

There is no immediate possibility of an increase in the price of bread to the consumer, Donald Gordon told the press last week after a closed meeting with officials of the National Council of the Baking Industry in Ottawa.

While the council made no formal request for an increase in bread prices, Mr. Gordon indicated the price line would be held indefinitely at its present level. This varies in different provinces, depending on the size of the loaf. In Ontario where a 24 ounce loaf is standard, the price is 10 cents.

He added that there also would be no relaxation of wartime controls or price increase of bakery products as a result of his conference with the baking officials, which was in the nature of a general discussion on the problems of the industry.

Seed Supplies For 1947

Yes, we're already thinking of seed grain for next spring. It's not too early either. This year, as for the past seven, the co-operative arrangement that registered and certified seed is made available to farmers thru elevator men will be in operation. Price lists are, or soon will be, in the hands of every elevator agent of the member companies of the Alberta Crop Improvement Association. Seed is also available from other grain elevator agents on similar terms. A farmer requiring seed of this quality to improve his crops or for seed production need only see his elevator man to place an order, and should do so at an early date if he wishes to be sure of getting the variety and grade he wants. The supply of the top grades is always limited and all grades of some varieties are likely to go quickly.

For those who do not desire registered or certified seed, indications are that there is no large section of the province in which, despite frost, drought or other hazard, there will not be seed on the farms for general seeding in 1947. There are some comparatively small areas so affected, but seed supplies are available within easy trucking distance in most cases. The problem of seed supplies should not be difficult, but when a farmer must buy seed he should endeavour to get only high quality seed of a recommended variety. This can be assured only by arranging for it early in the season while it is possible to pick and choose.

not legally permitted in any grade and should not be on the market. When you buy potatoes make sure that the grade is specified on the bag.

Know Your Potatoes

Although most housewives buying butter or eggs now make sure of the grade, few seem to realize that potatoes should be purchased in the same way. There is considerable difference in quality among the grade of potatoes offered for sale.

The Alberta department of agriculture is co-operating with the Dominion Marketing Service to improve the quality of potatoes appearing on the market, most of which will be designated Canada No. 1 or Canada No. 2. All potatoes packed must meet certain grade specifications established by statute. There is no reason why housewives should accept diseased, damaged or misshapen potatoes or potatoes below the minimum size. These defects are

READY TO DRIVE AWAY

- Buy It Today!
- Drive It Away!
- Put It to Work at Once!

The Jeep-of-all-Jobs Masters them all!

Here are a Few of the Many Uses for a JEEP

It's a TRUCK!

The Universal "Jeep" carries a load of 800 lbs. or tows a 5,500 lb. trailer pay-load. With 4-wheel drive, the "Jeep" goes places ordinary trucks cannot go.

It's a TRACTOR!

The "Jeep", with four wheels pulling, works speedily and efficiently as a tractor... operating plows, harrows, seeders, manure spreaders, ensilage harvesters, etc.

It's a MOBILE POWER UNIT!

Through an ingenious rear-end power take-off, the "Jeep" delivers up to 30 h.p. for operation of power devices... takes the power where you want it.

It's a RUNABOUT!

The "Jeep" is handy for trips to town... road speeds up to 60. You can depend on your "Jeep" through mud, snow and sand... it goes where ordinary cars cannot.

It's the UNIVERSAL "JEEP"!

Its amazing versatility makes the "Jeep" the slickest trick on wheels!

When you need a handy pick-up or delivery truck... load up your "Jeep", or hook on a trailer! When there's plowing or discing or harrowing to be done... "harness" up your "Jeep"! When you need mobile power to saw wood, pump water, spray trees or operate any power device... hook up the power take-off on your "Jeep". When you want a runabout... hop into your "Jeep"!

Come in and see for yourself how this one vehicle will fill a multitude of your needs... and spread its cost over year-round everyday use. Choose from three colours—orange, yellow or green.

See... Drive...

Ocean Levels

Geodetic Survey Shows Rise Every Century Is Over One Foot

According to the New York Times records of the United States Coast and Geodetic Survey for the past 20 years show that ocean levels are increasing at the rate of one and one-half feet a century. The rise started about 1920, but the trend may change at any time and sea levels may subside. H. A. Marmer, of the Coast and Geodetic Survey believes that the higher ocean level is attributable to the gradual receding of the world's great glaciers. As the ice melts the volume of water in the oceans increases. 2693

Bagpipes Popular

Scottish Tourist Committee Believe They Are Attraction To Tourists

EDINBURGH.—The music of the bagpipes was advocated as an added attraction for visitors to the land of the heather and the mist.

Tourist-seeking Scots said, however, that salmon, venison and trout might prove more palatable to the alien than the native haggis—a sort of pudding of offal, oatmeal and spices.

The importance of the bagpipes to the tourist trade was emphasized in a report by the tourist committee of the Scottish Council on Industry published recently which added that Scottish music and displays of Highland dancing would prove "a very popular form of entertainment."

Wheat is a more popular food than rice in north China.

OUR COMPLETE SHORT STORY—

When The Fire Falls

By GEORGE KAUFFMAN

 Copyright
Wheeler Newspaper Syndicate

THE snows of Austria glowed with an inner warmth as evening came over the Alps. Day always stays longer in the snow than in the soil. Caught within the drifts it lies hidden from the night in a soft radiant light.

A girl was skiing down a slope. Her skis cut through the bank like twin rapiers and threw up a flurry of snow as she arched from side to side in the wind. Suddenly she whipped out of sight and crouched behind a ledge like a snow-rabbit hiding from the hounds. . . . Soon she was joined by another skier, a man.

"The point is," said General Mott, of the Gestapo, "skis leave tracks. Her skis leave tracks. Why don't you follow them?"

Young Captain Kroger hesitated. "Her marks vanish."

"So?" The General thought this over. "Come now, Kroger. You were ski-master at the Hotel Luuck. What did you do while you taught the fat swine of Austria to ski? Just teach them, it seems. And now many of these same Austrians are skiing over the Alps to Switzerland. This is fine . . . fine!"

Hotel Luuck was the ski-retreat of all Europe. Nestled in a glacial valley the hotel sat in the snows like an old hen over her brood of chicks, chalets which dotted the snow slopes. The past clientele never visited the hotel. The Nazi social set had taken it over, and Goering himself gave huge hunting-skiing parties there for all the European quislings.

The night General Mott arrived to take a personal hand in the affair of the vanishing ski-tracks, the staff of the hotel had prepared the traditional Fire Fall, an ageless ritual of the peoples of the Alps. From a hanging valley burning embers were dropped, filling the evening with fire-shadows.

The General had finished his dinner on the balcony off his suite. "This is splendid," he said, taking a breath of the brittle glacial air. "One almost forgets there is a war on."

"The war seems very remote in the valleys," said Kroger.

"Then why do the people co-operate with this underground ski-thing?" Kroger remained silent.

"The silence of these valleys have affected even mine Captain, no?"

"Here is the fire-fall, sir," Kroger pointed out over the balcony. From far up the night the embers began falling down the vast grey glacial walls like fiery serpents.

"Beautiful," murmured the General. "Just like a Nazi torchlight parade."

Then another stream of embers began trailing down the walls. As if pulled down by magnet they began to form a crude V on the night.

"Stop this," shouted General Mott, jumping to his feet. "Hunt them down. Making a fool of me, they. Hunt them down!" He turned to Kroger. "What have we ski-troops for?" Go get them. Place guards in all the villages. Shoot any civilian on the slightest excuse!"

Next morning the General was awakened early by his orderly. "We have just received word from field radio, sir, that they have captured the girl."

"Ha! Splendid," laughed the General. "And you needn't tell me but the officer in charge was Captain Kroger."

That evening the girl was brought to the General by Kroger.

"Good evening," smiled the General. "I see you are beautiful. Mysterious women generally are. Tell me. Why do you help these Jews escape into Switzerland?"

"I help all who can no longer fight you inside Austria," she replied in firm level tones. "They continue to fight you elsewhere. This is no tourist business."

"You mean to say that you are not just helping the rich escape, but also putting out of our reach these criminal arsonists, these so-called patriots?"

"Every night and day. And when I am caught, someone else takes my place."

"This is fine . . . fine!" The General lit a cigarette. "Are you hungry?"

"Yes."

Too bad. I'm not. All of a sudden I have lost my appetite. He thought a moment. "Come. We go down to Vienna—now. Both of us in my car. Kroger, you drive!"

The dull bluish light of the hotel garage clothed the General and the girl in a murky gloom as Kroger drove up with the car. "You see?" explained the General as they got in. "I came here for a rest, but I find a fox. Ha!"

"Pardon," interrupted Kroger. "You seem to be out of petrol."

"Impossible," said the General. "My car is always serviced completely. I'll look in the tank." He got out and bent over the gauge.

A shot crashed out and echoed about the garage like a hollow drum-beat. General Mott slumped to the concrete floor.

A sentry rushed up to Kroger and reported: "Sir, I just shot a man tampering with your car."

"Good work, Corporal . . . I shall remember you for this."

Captain Kroger drove off. Out in the crystal night, clear and bright between the glacial walls, Kroger called back to the girl, "Climb up front. We have enough petrol for Switzerland."

Will Be Expensive

Rocket Research Stations To Be Built In Britain Costing \$80,000,000

Britain will spend £20,000,000 (\$80,000,000) to build rocket research stations during the next three years, the Daily Express stated.

The report added that annual running costs of the stations were estimated at £10,000,000.

Main objects of research would be guided anti-aircraft missiles, and "long-range defensive rockets", the Express declared.

Considerable sums also were earmarked for development of trans-Atlantic passenger rockets, while possibility of developing inter-planetary space ships would be investigated.

Concrete and cement are not synonymous—cement is just one of the ingredients of concrete.

The Quality Tea

"SALADA" ORANGE PEKOE

"Have a care Jack Dalton! Unhand that package of crisp, crunchy, delicious Grape-Nuts Flakes!"

"Curses! Foiled again! Every time I try to make off with some malty-rich, honey-golden Post's Grape-Nuts Flakes I'm stopped by this guy Curly Crisp!"

"And why not? That's a neat package you've got there. Those Grape-Nuts Flakes supply carbohydrates for energy; proteins for muscle; phosphorus for teeth and bones; iron for the blood; other food essentials."

"But these are no ordinary flakes! They're made of two grains—wheat and malted barley. And skillfully blended, baked and toasted for crispness, tempting taste and easy digestion."

"Hand over that giant economy package, villain. I'm a bit wolfish myself, when it comes to Grape-Nuts Flakes!"

SEIZED DRUGS

BRISBANE, Australia.—Since the start of the year, Queensland State customs officers have seized enough drugs, they estimate, to put to sleep the 350,000 population of this state capital city. They have found narcotic drugs hidden in cameras, in tankers' oil wells, in logs, clothing, personal effects and even in false teeth.

Volcanic dust is used for insulation. 2693

A Weekly Feature From The
Carbon Students' Union

Lloyd Nelson of Black Diamond was a grade one guest student in the primary room during the past week.

—★—

The Junior Red Cross Society of room 1 and 2 held a meeting on October 18th in room 2. After the business session we had a program which consisted of: Mary Flaws, announcer; Cynthia Barnes, "Sioux City Sue"; Shirley Gablehouse, a story; Corinne

Fuller, Shirley Hay, Jo Ann Ohlhauser, "I'm Forever Blowing Bubbles"; Corinne Fuller and Patsy McMann, "Over In Killarney"; Evangeline Stroski, a poem; Rea Maier and Ellen Ziegler, "When It's Springtime in the Rockies"; Audrey Martin and Marilyn Martin, "Loch Lomond"; Robert Stroski, "The Bill of Fare"; Wayne Garrett, "The Turkey's Opinion"; Enith Diede, "A Vision."

The travelling basket seems to be continuing very successfully. We wish to thank everyone for their kind co-operation.

—★—

We read in the Calgary Herald that Margaret Ritchie, a

former student of the Carbon High School has been elected convenor of the fellowship committee of the Young People's Union of the High River Presbytery. Marmie is also president of the Parkland Young People's Union.

—★—

During chemistry period the shrinkage of cloth was being discussed. One boy replied, "Nowadays you have to buy a nightshirt to get a dress shirt."

Summerfallow Hint

You may have done a good job on your summerfallow this year, but are you sure the soil is tied down? Many summerfallow fields that have been worked during the past season to control weeds are now in such fine, powdery condition the first big wind that comes along may start the dust flying. These fields are in danger of drifting during the winter and early spring, and are likely to wash when the spring run-off starts.

Where the surface is very fine and powdery and where the type of soil is such that a lumpy condition may be obtained by plowing, late fall plowing might be advisable. Ridging with lister shovels on the duck foot cultivator is also recommended to prevent soil drifting. Where there is danger of water erosion, working with a duck-foot cultivator at right angles to the slope will assist considerably.

Ice Well for Farms

A cheap and reliable means of maintaining high quality in milk and cream before shipping from the farm is by regular use of an ice well for cooling purposes. This is especially important during warm weather conditions.

An ice well built at this season of the year makes it possible to lay in an ample supply of ice during the winter months. Construction of an ice well is simple and inexpensive. By digging and cribbing a comparatively shallow hole in the ground, ice can be prepared in the winter and used during the summer months for proper cooling of milk and cream.

Detailed plans of ice well construction may be secured from the local creamery, the district agriculturist, or the dairy branch of the department of agriculture, Edmonton.

A colored man doing a hauling job was told he couldn't get his money until he submitted a statement. After much mediation he evolved the following bill: Three comes and three goes at four bits a went, \$3.00
